STATE OF Wyoming

NAME: STATEWIDE UPLAND GAME HARVEST

PROJECT N. W-27-R-45

PREPARED BY: Biological Services

Period Covered: January 1, 2007 to January 1, 2008

ABSTRACT:

This report contains the results of harvest surveys for the 2007 small game, upland game bird, migratory game bird, wild turkey, and furbearer hunting seasons. Harvest and hunting (or trapping) activity estimates were obtained by surveying licensed hunters with mailed questionnaires or through mandatory reporting.

OBJECTIVES:

1. To determine the 2007 small game, upland game, waterfowl, turkey, and furbearer harvests.
2. To determine the number of days spent hunting (or, for furbearers, trapping) all species of small game, upland game birds, migratory game birds, and furbearers; the number of days required to harvest an animal; and the percent success of hunters in the field during 2007 hunting season.

PROCEDURES:

Harvest questionnaires were mailed to a random sample of 2007 daily, annual and lifetime small and upland game bird license holders and to all 2007 furbearer trapping license holders. License holders were stratified by license type and hunt area or management area, where applicable. Details of obtaining information for furbearer trapping license holders are provided in the abstract preceding that section. Spring and fall turkey license holders were surveyed separately at 100% of the licenses that were entered into the Department's license information database in time for inclusion in the spring and fall surveys. Estimates of harvest by falconry were obtained through mandatory reporting by falconers. Early goose and crane hunting season license holders were surveyed at 100%, as were holders of Light Goose Conservation Order permits (mandatory reporting). The procedure used in making the harvest and hunting pressure estimates was similar for all species or species groups that were randomly sampled, and it was similar for those sampled at 100%. These harvest surveys were conducted by the Department's Biological Services section.

FURBEARER ABSTRACT

The number of furbearer licenses that have been sold in Wyoming annually has increased over the past few years. In past years, annual furbearer licenses sales ranged from 1,000 to 1,200. In 2006, 1623 furbearer trapping licenses were sold; and in 2007, 1,844 were sold. Furbearer trapping licenses represent less than one tenth of one percent of the total annual licenses sales.

Eleven species (badger, bobcat, marten, weasel, coyote, raccoon, red fox, skunk, beaver, mink and muskrat) are allowable take for trapping license-holders. Further, coyotes, raccoons, red fox, and skunk are classified as predators, which may be taken without a license. Landowners, or their designee(s) may also take beaver, bobcat, weasel, badger, and muskrat if damage is being caused. Wyoming lists 37 management areas available for trapping. Traps, snares, archery equipment, and rifles are all allowable methods of harvest, even though traditional trapping has been the main focus of the surveys. Other than minimal restrictions on beaver and marten harvest in some areas, Wyoming has not set limits or quotas on harvest of furbearing animals.

Although tagging of bobcat pelts with Convention on International Trade of Endangered Species (CITES) tags has been mandatory since July 1, 1990, response to Wyoming's furbearer harvest survey is not mandatory. Until 2001, the Wyoming Game and Fish Department surveyed all furbearer trapping license-holders each year to obtain effort and harvest information on all species trapped, snared or shot, as allowed by the trapping license. The harvest survey was terminated because of poor response and the inability to extrapolate results to estimated totals. Despite less than desired response rates in the past, furbearer trappers have contributed valuable information. Due to the secretive nature of most furbearing animals, trapping data on swift fox, ermine, lynx, river otter and other rarely observed species has provided the Department with information on these species that might not otherwise have been collected.

In 2005-06, the furbearer harvest survey was resumed. It was greatly simplified to address some of the earlier issues in the hope that response would greatly improve. For 2005-06, only statewide results were available. For 2006-07 and 2007-08, we have also provided the information by furbearer management area. Also for the past two bobcat trapping seasons, we first report statistics related only to the bobcat harvest reported during CITES tagging, which runs November to March. Then we report furbearer harvest survey results and statistics on all allowable species, including bobcat. The different methods of harvest estimation between the CITES tagging and the survey extrapolation in the bobcat harvest statistics result in different bobcat harvest, trapping/hunting effort and trapper number estimations.

(b) "Green pelt" means the untanned hide or skin of a furbearing animal.

(c) "Owner" means the person who physically sets any trap or snare in any fashion which may result in the take of any furbearer or predatory animal.

Such traps include, but are not necessarily limited to, Conibear type traps. For the purposes of this regulation, snares are not considered quick-kill body grip trap(s).

(e) "Trapping" or "trap" means the taking of a furbearing animal by trap, snare or with a firearm or archery equipment.

Section 3. Trapping Seasons Established. There shall be open seasons for the trapping of furbearing animals and the use of dogs to take bobcats as set forth in Trapping Seasons (Section 4), Furbearing Animal Trapping Area Descriptions (Section 5), Common Season Boundary (Section 6), Limited Quota Furbearing Animal Trapping Areas (Section 7), Authorization to Trap (Section 8), Mandatory Bobcat Registration (Section 9), Trapping of Non-target Wildlife; Disposition of Furbearing Animals at the Trap Site (Section 10), Use of Dogs (Section 11), Trap Identification Numbers (Section 12), Violation of Commission Regulations (Section 13) and Savings Clause (Section 14) of this Chapter. Section 7. Limited Quota Furbearing Animal Trapping Area Permits. Limited quota trapping areas shall be open only to the person(s) who possesses a furbearing animal trapping permit for the limited quota trapping area and a furbearing animal trapping license. Permit holders shall be determined by a random computer selection.

(a) Application for Limited Quota Furbearing Animal Trapping Permits. Applications shall be available from Wyoming Game and Fish Department Regional Offices, the Cheyenne Headquarters Office and game wardens. Any qualified person may submit one (1) application for a limited quota trapping area drawing and may list as many as three (3) choices.

(b) When trapping, each permit holder shall present his/her permit and a valid Wyoming furbearing animal trapping license for inspection upon request to any law enforcement officer empowered to enforce these regulations.

After the regular drawing, applicants may apply for limited quota trapping area permits not issued in the drawing for limited quota furbearing animal trapping areas. Applicants shall apply to the Headquarters Office. Permits shall be issued in the order the applications are processed or until quotas are reached. Submission of an application either through the mail or hand delivered shall not guarantee a permit

Section 8. Authorization to Trap.

(a) Any person holding a valid Wyoming furbearing animal trapping license shall be authorized to trap furbearing animals in any trapping area specified in the current trapping regulations, excluding those species within limited quota furbearing animal trapping areas requiring a limited quota furbearing animal trapping permit as specified in this regulation and excluding closed areas in Section 5(b) of this regulation.

(b) Individuals issued limited quota furbearing animal trapping permits shall contact the game warden listed on the notice for instructions prior to taking permitted furbearing animals in the limited quota furbearing animal trapping areas.

Section 9. Mandatory Bobcat Registration. All bobcats harvested in Wyoming shall be registered with the Department by the person taking the bobcat, regardless of the final disposition of the pelt or unskinned carcass. Bobcat pelts may be registered throughout the bobcat season, but registration of pelts shall end at 5:00 p.m. on March 11 of each year. The properly licensed trapper shall present the pelt or unskinned carcass in an unfrozen condition to a game warden or a Department Regional Office. It shall be unlawful to possess an untagged green bobcat pelt after the registration period expires. Before a Wyoming bobcat tag shall be issued, the person taking a bobcat shall provide to the Department at the time of registration, the age and sex of the bobcat, the number of the Department's bobcat management area in which the bobcat was taken, the date the bobcat was taken, the number of traps that were set, and the number of days traps set or days hunted with a firearm (i.e. trapping or harvest effort). A Wyoming bobcat tag shall be attached to the pelt or unskinned carcass by an employee of the Department. Wyoming bobcat tags shall be issued free of charge.

Section 10. Trapping of Non-target Wildlife; Disposition of Furbearing Animals at the Trap Site. All non-target wildlife, including but not necessarily limited to game animals, game birds, furbearing animals, protected animals and/or protected birds, that are trapped, shall be released unharmed. If a big or trophy game animal, game bird, protected animal or raptor caught has been injured to the extent that the injury may result in death of the animal or if the animal has been killed, the trapper shall immediately notify a Department enforcement officer. Furbearing animals legally taken by a holder of a valid furbearing animal trapping license during an open season shall be either killed at the trap site or released to the wild. If the trapper holds both a furbearing animal trapping license and a license to capture furbearing animals for domestication, the furbearing animals do not have to be killed at the trap site.

Section 11. Use of Dogs. Persons possessing a valid furbearing animal trapping license may use dogs to take bobcats during the bobcat trapping season.

Section 12. Trap Identification Numbers. All traps and snares used for furbearing or predatory animals shall be permanently marked or tagged with the name and address of the owner or the identification number assigned to the owner by the Department.

(a) A person may apply for a trap identification number from the Department. Each individual shall be issued only one (1) trap identification number for the life of the trapper. Trap identification numbers shall be transferable from one (1) person to another only upon completion of an application and approval by the Department.

(b) Trap identification numbers shall consist of the prefix WY, followed by the last two (2) digits of the calendar year in which the number is issued, followed by a number generated by the Department. A hyphen shall separate the three (3) portions of the number. For example, the first trap identification number issued in calendar year 2001 shall be WY-01-001. Numbers shall be legible, at least one-eighth (1/8) inch in height, and affixed to traps in such a manner as to read left to right. The trap identification number shall be stamped on the trap or on a metal tag that is affixed to the trap.

(c) Application for a trap identification number shall include the full name and complete home address of the applicant and shall be submitted on a form provided by the Department. Applications shall be submitted to the Wildlife Division, at the Headquarters Office of the Wyoming Game and Fish Department.

(d) Any person who has obtained a trap identification number shall notify the Department by telephoning (307) 777-4686 within thirty (30) days of any change in address.

Section 13. Violation of Commission Regulations. Failure to abide by the provisions of this regulation shall be punishable as provided by Wyoming statutes for violation of Commission regulations.

Section 14. Savings Clause. If any provision of this regulation is held to be illegal or unconstitutional, such a ruling shall not affect other provisions of this regulation which can be given effect without the illegal or unconstitutional provision; and, to this end, the provisions of the regulation are severable.
